

# GILLO GY

## The Universal BOW

More than two years of development and several prototypes of risers and limbs tested already are bringing you our final solution for the beginner's bows:

### The "Bow in a Box" solution.

- One single riser (GY-24) of one single size for any sort of beginner, based on the world proven GILLO GT technology, now pushed from its 30% adjustment limit to a new incredible >40% (+15% - 25%) limit.
- One single pair of limbs with one single poundage (GYL-01-66-24) with specially designed curve to allow the full use of the range of adjustment offered by the GY 24 riser.
- A special length Fast Flight string to allow the full use of the poundage range of the GY bow.
- Plastic rest and finger protectors provided in the box.

**NO MORE NEED OF MULTIPLE BEGINNERS BOWS with different lengths and poundage's!**

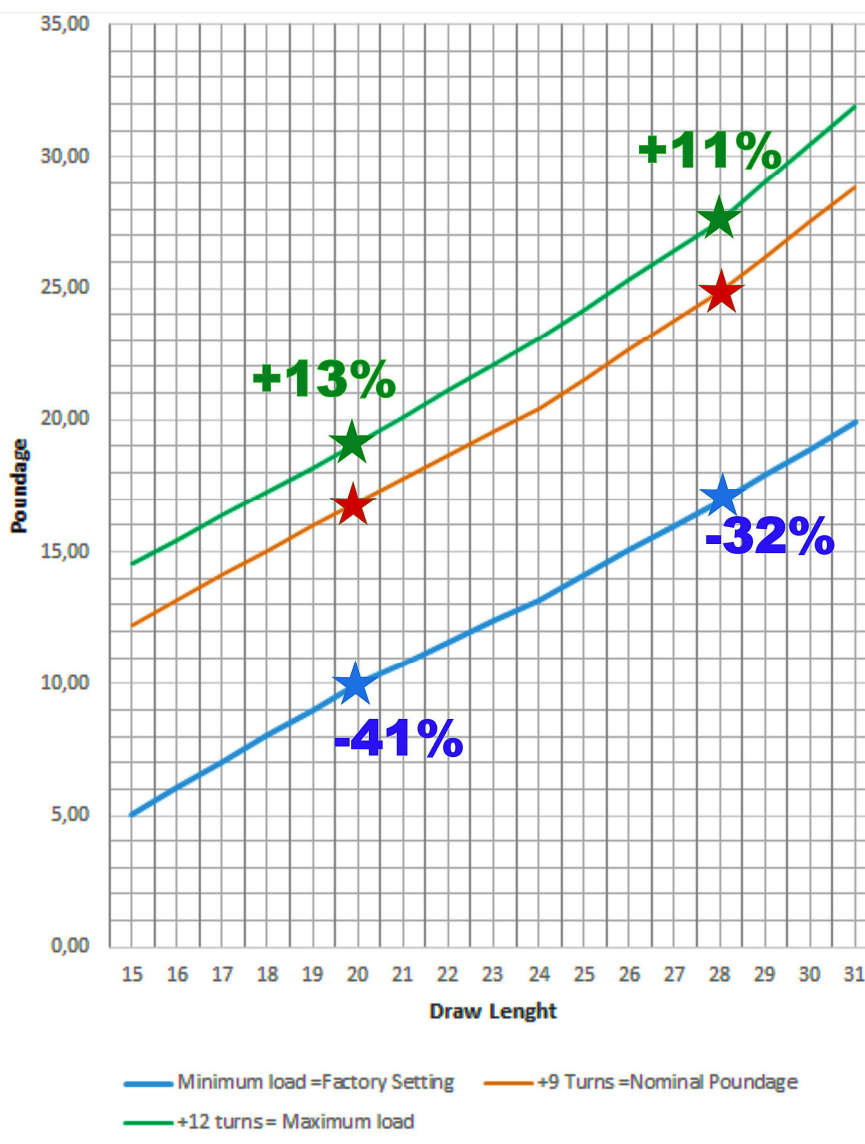

***"One Bow to rule them all, One Bow to find them, One Bow to bring them all, and in the Archery bind them"***

Well, we are so proud of this incredible innovation that Tolkien will forgive the poetic license!

## The Universal Bow in a Graph

**The GY Bow is supplied with a GY riser with limbs bolts set at the minimum poundage.**

At this setting, the bow is working with a Brace Height of approximately 8 ¼" and is suitable as it is for beginners having a Draw Lengths from 15" to 31"

**Poundage can be easily increased to better fit the need of the user**, if needed, by operating the limbs bolts.

**Adding 9 turns to the limbs bolts will transform the GY to a standard ILF bow** with nominal poundage of 25# @ 28 "and a bow length of 65", and an approximate Brace Height of 7 ½".

**With 3 more turns of the limbs bolts, total +12 turns from factory setting**, the bow will decrease its Brace Height to 7" and will n be able to reach is maximum usable poundage of 32# @ 31" of Draw Length

## **FULL BOW KIT GYB**

### **G20B-65-25**

### **Specs and Figures**

- Recurve Bow Kit for beginners of any age, height and strength
- 65" length full Bow, RH/LH versions
- **Suitable for draw lengths from 15" to 31"**
- **GY riser floating limbs pockets allow over 40% poundage adjustment range (+15% to -25%)**
- **GYL special curve limbs nominal 24#, allow adjustment from 10# to 32# depending from Draw Length**
- **Riser with Integrated Neoprene shock absorbers**
- **12 strands, 159 cm long HPE based string with rubber fingers protectors installed on it is included**
- **Plastic screw-in rest is included**
- Compatible to all G1, GQ, GT grips
- 1 front center Stainless Steel stabilizer bushing
- 1 Round seat for additional weights
- **Approx. 1100 g mass weight for riser and 375 g mass weight for limbs, total for full bow assembled approximatively. 1500 g**
- Dual Color versions RH/LH: Black (SBK), Blue (SBL), Red (SRD)
- Quad color versions RH: Black body with Red/Silver/Blue or Red/Silver/Green pockets
- Packing includes also an accessory pack with long clicker plate, Manual with Warranty card, 4 Allen wrenches, 1 clicker SS screw

#### **Optional accessories available:**

- Various grips made by wood or plastic 3D printed in various colors
- Special round weights kit to fit in in the lower part of the riser
- 16 strands 160 cm BCY 8125 replacement string
